Lateral Pharma Appoints Scientific Affairs Manager - Dr Lauren Ely

Lateral is pleased to advise of the appointment of Dr Lauren Ely as our Scientific Affairs Manager. Lauren will commence with Lateral on 09 May 2022, reporting to Dr Stuart Mudge, VP Research & Clinical Trials.

Lauren is a PhD scientist with a strong scientific track record in both academia and industry, including 10 years of experience at Pfizer USA. During this time Lauren was project leader for several pre-clinical biologics programs and a phase I oncology trial, with four candidate drugs successfully out-licensed and one that moved into in-house clinical development.

Of particular relevance to Lateral, Lauren's experience includes leading interdisciplinary teams within Industry-Academic collaborations, co-inventorship on four published patents, authorship on a range of scientific papers, and invitations to speak at international conferences.

We are very pleased that a candidate of Lauren's calibre has agreed to join our team. Her blend of skills and experience will be invaluable in progressing Lateral's strategic plan and commercialising its intellectual property.
