
Lateral promotes two members of its team to senior positions

14 February 2023

Lateral is very pleased to announce the promotion of two staff members. With these promotions, Lateral Pharma's new structure will better enable it to manage expected company growth and ensure that structures and reporting lines are better defined.

We congratulate the following members of Lateral team on their new roles.

Dr Stuart Mudge promoted to Chief Operating Officer

Stuart, who joined Lateral as VP Clinical Trials & Research in 2021, will expand his existing role to include day-to-day management and the operational responsibilities of Lateral. He will report to David Kenley and allow David to focus more on high level strategy matters.

When joining Lateral, Stuart brought with him more than 20 years working in scientific and operational roles with organisations including Mayne Pharma, CSL and Paris-based Voisin Consulting.

Dr Lauren Ely promoted to Head, Non-Clinical Research and Development

Dr Lauren Ely commenced at Lateral Pharma in May 2022 and has already made a significant contribution to its non-clinical research and development.

Lauren is a PhD scientist with strong scientific track record, including 10 years with Pfizer USA where she was a research project lead for several pre-clinical programs and a Phase I oncology clinical trial.

Complimenting both Stuart and Lauren on their appointments, Lateral CEO David Kenley said

"Stuart and Lauren have both contributed substantial value to Lateral since they joined our team. I'm delighted that Stuart and Lauren will continue with Lateral in these more senior roles. These promotions provide Lateral with a refreshed senior management team and give Lateral greater scientific depth and compliment very well with the skills and experience of our Chief Scientific Officer, Dr Andy Gearing"

Ends.
